

Complete Turnkey Investigative Solutions

Fraud, eDiscovery, data leakage or just run-of-the-mill employee misconduct investigations can seem easy enough at the beginning. However, these investigations can quickly blow up both in complexity and scope. When this happens you need a partner you can trust.

So as a world-leading, digital investigation solution provider, we built a team of experts to provide you with cutting-edge professional services. Our experts can handle any type of investigation from the largest eDiscovery matter to an employee misconduct investigation involving a single computer. And because we focus on hiring highly experienced professionals with extensive government and law enforcement backgrounds, we're able to carry your case from collection all the way to review and expert witness testimony.

INTERNAL AND CRIMINAL FORENSIC INVESTIGATIONS

Forensic Investigations: Data acquisition, preservation, analysis and detailed reporting on virtually any device and data type including servers, desktops, and handheld devices.

Email Forensics: Our FTK® technology is recognized as the leading forensic solution for email analysis, able to automatically break out email and attachments with support for 11+ different email formats.

Decryption/Password Cracking: We support more than 100 software applications, encrypted containers, and operating systems for recovering lost, forgotten or unavailable passwords and can offer large-scale distributed cracking capabilities when necessary.

SECURITY INCIDENTS AND INFORMATION ASSURANCE

Incident Response Investigations: From identification to root cause analysis to remediation. Our state-of-the-art incident response technology allows us to quickly and effectively diagnose security incidents and clean your network after an intrusion.

Malware Detection and Clean-up: Basic malware detection is easily handled by anti-virus tools, but advanced threats, such as ATPs, rootkits and custom malware are a different story. AccessData can address these issues in both a proactive and reactive manner to prevent widespread damage and reduce the chances of future incidents.

Data Spillage Clean-up: AccessData can diagnose and resolve even the most severe data leakage incidents in a quick, secure and cost effective manner.

IP Theft Investigations: Our digital investigation experts have extensive experience tracking down and building cases against criminals. Using our technology, we will determine what was taken, who took it, and where they took it.

EDISCOVERY

Data Collection: We offer full forensic collection of unstructured, semi-structured and structured data. Our court-validated technology enables time- and trial-proven methodologies. All data collection activities are meticulously documented, and evidence is handled and reviewed in accordance with law enforcement methodologies and the new amendments to the federal rules of civil procedure.

Data Production and Processing: All data collected is culled, indexed and can be processed into usable formats, including native format, tiffs, pdfs and load files.

Data Hosting and Review: All processed data can be made available for review using any of the popular third-party review platforms or can be hosted and made available through our own secure hosting and review capabilities.
